Mute in neoprene per immersioni subacquee.

CE CERTIFICATION - EN14225-1:2017

Tutte le mute descritte in questo manuale sono state sottoposte a un esame di tipo CE, la procedura attraverso la quale l'ente di ispezione autorizzato stabilisce e certifica che il modello di Dispositivo di protezione individuale (DPI) in questione è conforme al regolamento europeo 2016/425. La certificazione CE, EN14225-1:2017, è un marchio che garantisce che il DPI rispetti i requisiti di sicurezza. Tale regolamento definisce le condizioni che governano l'immissione sul mercato e il libero movimento all'interno della Comunità, nonché i requisiti basilari di sicurezza, che il DPI deve soddisfare per garantire la protezione della salute e della sicurezza. Il DPI è mule impiegate principalmente per uso subacqueo, sono DPI di categoria I e sono collaudate in conformità alla norma europea EN14225-1:2017.

Tutte le mute Mares descritte in questo manuale hanno superato l'esame di tipo CE indicato sopra e ottenuto la corrispondente certificazione CE. Tali esami sono condotti da RINA, ente notificato 0474, situato in Via Corsica 12, 16128 Genova. La conformità CE è indicata dalla marcatura "CE". The wetsuits described in this manual are manufactured by Mares SpA, located in Salita Bonsen 4, 14035 Rapallo (GE), Italy.

Classe di prestazione termica		Temperatura dell'acqua (°C/°F)

VESTIZIONE
Indossare la muta e gli accessori in modo corretto consente di migliorare e ottimizzare la qualità e il comfort dell'attività. È importante dedicare a questa fase di preparazione il tempo necessario. Sistemare correttamente la parte frontale e il retro della muta in posizione di equilibrio stabile, infilare i piedi nelle gambe della muta luno alla volta e allineare i mani e le tette. Per evitare pieghe scomode e punti di pressione, indossare la muta nel modo adeguato. L'accuratezza della vestizione evita fastidio e ingresso d'acqua durante l'immersione. Indossare gli eventuali accessori e, infine, assicurarsi che le cerniere siano chiuse correttamente. Per chiudere la cerniera posteriore in modo appropriato, effettuare di forzaria infilamento con il rischio di romperla, stringere l'apposita linguetta alla base della cerniera e usare l'altro mano per allentare e tirare il tirapù.
In caso di utilizzo di muta con interno in Open-Cell, occorre lubrificare preventivamente l'interno con una miscela di acqua e sapone neutro antialergico al 10%, quindi indossare prima i pantaloni e successivamente la camicia, partendo dalle braccia ed infilando la testa e sistemando infine la muta per una perfetta aderenza al corpo. Foto 1 e 2

ESTIVIZIONE
Per una corretta procedura di vestizione, seguire i passi indicati di seguito.
In posizione di equilibrio stabile, con sufficiente spazio a disposizione, aprire la cerniera per avere maggiore libertà di movimento, rimuovere gli accessori e cominciare a sfilare la muta dall'alto verso il basso, svingendola dall'interno verso all'esterno.
La facilità di questa operazione aumenta se svolta con la muta ancora umida.
Al termine della procedura il corpo della muta sarà rivestito.
In caso di utilizzo di muta con interno in Open-Cell, sfiorare la chiusura della camicia e sollevare la parte sull'addome rigandola verso il petto, in modo da portare la coda sopra le spalle (foto 3). Quindi tirare sfilando prima le braccia e poi la testa (foto 4 e 5).

MANTENIMENTO E CONSERVAZIONE
Use of the wetsuit in the presence of chlorine in the presence of chlorine.
• Dopo ogni uso lavare accuratamente la muta con acqua dolce.
• Per asciugare la muta prima all'interno e poi all'esterno.
• Non fare asciugare al sole.
• Non avvicinare a fonti di calore.
• Evitare l'uso di prodotti detergenti.
• Conservare la muta sistemata su un appendino in un luogo asciutto.

Use of the wetsuit in the presence of chlorine is not advised.
• After every use, carefully wash the wetsuit with fresh water.
• Do not leave it to dry in the sun.
• Do not place near sources of heat.
• Do not use cleaning products.
• Store the wetsuit on a hanger in a dry place.

Use of the wetsuit in the presence of chlorine is not advised.

CE CERTIFICATION - EN14225-1:2017

All wets described in this manual have undergone an EC type examination, which is the procedure whereby the approved inspection body establishes and certifies that the PPE in question satisfies the relevant provisions of the European Regulation 2016/425. The CE certification, EN14225-1:2017, is a mark that guarantees that the PPE meets the safety requirements. This regulation defines the conditions that govern the placing on the market and free movement within the Community and the basic safety requirements which PPE must satisfy in order to ensure the health protection and safety of users. The PPE is mainly intended for use as subaquatic equipment, and is of category I and has been tested in conformity with the European standard EN14225-1:2017.

All wetsuits described in this manual have passed the EC type examination described above and obtained the corresponding CE certification. The examinations are carried out by RINA, notified body 0474, located in Via Corsica 12, 16128 Genova, Italy. CE conformity is denoted by the "CE" marking. The wetsuits described in this manual are manufactured by Mares SpA, located in Salita Bonsen 4, 14035 Rapallo (GE), Italy.

Thermal performance class		Water temperature (°C/°F)	
A	B	7-12 °C/45-54 °F	A
	C	10-18 °C/50-64 °F	B
	D	16-24 °C/61-75 °F	C
B	C	10-18 °C/50-64 °F	B
C	D	16-24 °C/61-75 °F	C
D	D	22-30 °C/72-86 °F	D
